

## **Publications Katrin Schachtl**

### **Theses**

Master thesis at Alfred-Wegener-Institute, Helmholtz Centre for Polar and Marine Research

Topic: "Effects of predation on Arctic marine soft-bottom infauna"

Bachelor thesis at the Limnological Station Iffeldorf, Technical University of Munich

Topic: "Genetische Untersuchung an *Galerucella nymphaeae* anhand deren Fraßpräferenzen"

### **Publications**

Petrowski, S., Molis, M., **Schachtl, K.** & Buschbaum, C. (2015). Do bioturbation and consumption affect coastal Arctic marine soft-bottom communities? *Polar Biology*, 1-13.

### **Conference contributions**

**Schachtl, K.**, Giessler, S. & Stibor, H. (2015). Invasive Arten im Plankton heimischer Gewässer – die ökologische Rolle neuer Nahrungsnetzglieder. Forum for PhD students of the German National Academic Foundation, Heidelberg, Germany. Talk.

**Schachtl, K.**, Giessler, S. & Stibor, H. (2015). Genetic and ecological characterization of the invasive freshwater jellyfish *Craspedacusta sowerbii*. Fresh Blood for Fresh Water (FBFW), Mondsee, Austria. Poster, rewarded with the 2<sup>nd</sup> prize.
